PROFESSIONAL SUMMARY

Innovative and results-driven Computer Science student with a strong foundation in full-stack development, Machine Learning, and building real-world applications. Proven ability to rapidly prototype and deliver solutions, especially in high-pressure environments like hackathons. Experienced with modern technologies including React, Node.js, and Python. Passionate about building impactful products, collaborating in teams, and continuously learning new tools and technologies.

TECHNICAL SKILLS

Languages: Python, C++, Java

Frontend: HTML, CSS, JavaScript, React

Backend: Node.js, Express.js, Django, FastAPI

Databases: PostgreSQL, MongoDB

EDUCATION

Bachelor of Technology — Computer Science (CGPA: 7.25/10) 2023 – 2027

Adani University, Ahmedabad

Higher Secondary — Science (83.97%) March 2023

Ag Teachers, Ahmedabad

PERSONAL PROJECTS

Game Grid – Sports Event Platform / *React.js, Node.js, Express.js, MongoDB, REST APIs*

A full-stack web application designed to simplify how users discover, join, and manage sports events.

- Developed a multi-role system supporting players, venue owners, and event managers.
- Implemented user authentication and authorization for secure, role-based access.
- Built features like event listing, slot booking, and participation management.
- Designed responsive and user-friendly UI; integrated frontend and backend with REST APIs.

Classroom Slot Reservation System / *React (Vite), CSS, Node.js, Express.js, PostgreSQL*

A web-based system to efficiently manage classroom availability in college.

- Designed a system to view, book, and manage available classroom slots.
- Reduced scheduling conflicts and improved resource utilization across faculties.
- Implemented a user-friendly interface for both students and faculty.

Tomato Disease Prediction System / *Python, TensorFlow/Keras, Streamlit, NumPy, OpenCV*

An AI-powered application that detects plant diseases using deep learning image classification.

- Built a deep learning model using TensorFlow/Keras for accurate disease prediction.
- Preprocessed image datasets and fine-tuned model for improved accuracy.
- Developed an interactive UI using Streamlit; enabled users to upload leaf images for instant predictions.

SOFT SKILLS

Problem Solving • Team Collaboration • Time Management • Adaptability • Communication Skills

CERTIFICATIONS

- AWS Machine Learning Foundation — Amazon Web Services (2025)
- AWS Cloud Architecting — Amazon Web Services (2026)
- Get Started with Jira — Coursera (2026)
